

CENTER *for*
COLLABORATION *and*
COMMERCIALIZATION

Stimulating Innovation • Cultivating Entrepreneurs • Generating Jobs

Sandia National Laboratories is dedicated to increasing partnership and technology transfer activities in support of our mission. The **Center for Collaboration and Commercialization (C3)** serves as a “front door” to Sandia and is designed to strengthen partnerships, technology transfer,

and ties to the community, and offers services to boost Sandia’s interaction with industry, academia, and government.

C3 is an integral part of the Lobo Rainforest Building in downtown Albuquerque. By co-locating members of our technology transfer team with others from University of New Mexico and Air Force Research Laboratory, we are collectively helping to amplify technology transfer impact across New Mexico.

PROGRAMS & SERVICES

- Co-Working Space
- Collaborative Space
- Entrepreneur Exploration
 - Roundtables
 - Webinars
 - Workshops

- Small Business Assistance

Sandia
National
Laboratories

C3 provides users the opportunity to take advantage of the vibrant entrepreneurial and startup ecosystem downtown. Sandia offers the Entrepreneur Exploration program, focused on linking Sandia principal investigators with entrepreneurial opportunities and resources provided by a multitude of partners. This program is designed to invigorate an entrepreneurial culture at the Labs and inspire Sandia researchers to either go into the business world or develop that innovative mindset while at the Labs.

COMMUNITY BENEFITS

- Access to Labs' technologies
- Access to Labs' experts
 - Licensing
 - Agreements
 - New Mexico Small Business Assistance
 - Supplier Diversity
 - Community Involvement
